

ROHMAT SUSENO

iOS Engineer | Swift | UIKit | SwiftUI

Yogyakarta, Indonesia • +62 816881691 • rohmatsuseno@gmail.com • [linkedin.com/in/rohmatsuseno](https://www.linkedin.com/in/rohmatsuseno) • github.com/sseno

Summary

iOS Engineer focused on building reliable and maintainable applications. Contributed to the core Document product at Privy, as well as products at MNC Innovation Center (iNews.id), and Technopartner Indonesia. Experienced in Swift, UIKit, Combine, MVVM, and Modular Architecture. Values clear code, thoughtful technical decisions, collaboration, and continuous learning.

Experience

Software Engineer iOS

Yogyakarta

PT Privy Identitas Digital

August 2022 - July 2026

- Revamped the end-to-end document workflow.
- Improved PDF annotation placement across varying page sizes, including resize, rotation, long-press, and tap-to-drag interactions.
- Contributed to improvements in other feature modules, including Registration and Profile.
- Integrated document workflows with chat and push-notification deep-link routing.
- Contributed to modular MVVM architecture decisions, peer code reviews, and cross-team technical coordination.
- Researched technical solutions for the document-signing experience.

Part-time iOS Developer

Remote

PT Solusi Code Indonesia

October 2022 - August 2023

- Developed Swift and RxSwift features, including client-side PDF generation for invoices and transaction details.
- Resolved registration-flow issues.

iOS Developer

Yogyakarta

Technopartner Indonesia

April 2020 - August 2022

- Developed and maintained iOS applications for consumer brands including Ixobox, MAXX Coffee, and Jiwa+ using Swift, Texture, and MVVM.
- Worked across multiple client products and collaborated with cross-functional teams.
- Integrated payment gateways.
- Developed and delivered production features.
- Troubleshoot production issues and improved application performance.
- Handled App Store submissions and production releases.

Mobile Application Developer

Bandung

MNC Innovation Center

July 2018 - April 2020

- Developed iNews.id v2 using Swift, MVVM, programmatic UIKit, and Auto Layout.
- Built authentication, comments, and customizable news-category features.
- Implemented Realm-backed local storage, dark mode, push notifications, and deep-link routing.
- Improved application performance, resolved production issues, and supported post-release stability.

Skills

iOS: Swift, UIKit, SwiftUI, Combine, Auto Layout, SnapKit, Alamofire

Architecture Patterns: MVVM, MVC, VIPER

Quality and Delivery: Unit Testing, Firebase, Crashlytics, Fastlane, CI/CD, Git

Selected Projects

AEON Fast [\(App Store\)](#)

- Developed Swift and RxSwift features for a multipurpose financing application.
- Built client-side PDF generation for invoices and transaction details.
- Developed and improved the user registration flow.

Ixobox [\(Project Details\)](#)

- Developed UI components using Texture within an MVVM architecture.
- Implemented Realm for local data storage.
- Integrated Firebase Cloud Messaging and Firebase Crashlytics.

Jiwa+ (Kopi Janji Jiwa) [\(Project Details\)](#)

- Refactored checkout, product-purchase, promotional transaction, product-detail, and transaction-history flows.
- Integrated and improved payment flows through Midtrans SDK.
- Developed membership and reward-claim features.

Education

Bachelor of Informatics Engineering

Institute of Science and Technology AKPRIND Yogyakarta

Graduated 2018 | GPA: 3.51/4.00
